3. During this reporting period, as in the previous reporting period, there was a further slight reduction in the number of staff applicants handled by IB (178 to 208) but an increase in the number of RIP cases handled to 32 (as compared to 28 the previous month). At the end of the reporting period, the repolygraph program of senior OS officers was completed. The repolygraph of OS employees will continue, but in conjunction with the regular background reinvestigation process.

4. The average number of cases handled per man during the reporting period is 2.1, an increase as compared to the previous month. The report rate, excluding the OS repolygraph cases, is 44 percent, a slight decrease from the previous month. This percentage falls to 38 percent when the OS repolygraph cases are included.

5. There were no "specific" cases handled during the month of August. However, in one instance, a staff applicant who had been polygraphed on 20 June (IB# 99627), wrote to the Agency complaining of the treatment he claims to have received during his polygraph interview. There is also a change in polygraph coverage given Agency retirees of more than one year in that they will be asked CI questions, but not those relating to personal history verification or blackmail.
